INFORMACIÓN PARA TODOS

COMPORTAMIENTO DE LOS PRECIOS

Se redujeron los precios de los alimentos

El Departamento Administrativo Nacional de Estadística (DANE), por medio del Sistema de Información de Precios y Abastecimiento del Sector Agropecuario (Sipsa) comunicó que durante la semana del 12 al 18 de diciembre de 2020 disminuyeron las cotizaciones de las verduras, las frutas y los tubérculos.

Bajaron los precios de las verduras, debido al comportamiento de la habichuela, el tomate chonto, el pimentón, la remolacha, la zanahoria, la cebolla cabezona blanca, la arveja verde en vaina, el chícolo mazorca, el ajo y el frijol verde en vaina. Se registró una mayor producción de la habichuela en Santander, Norte de Santander, Tolima, Antioquia, Valle del Cauca y Cundinamarca, ante la salida de las cosechas. De la misma forma, se presentó un incremento en la producción de tomate chonto en Huila, Antioquia,

Tolima y Valle del Cauca, lo que ocasionó la reducción de los precios.

También cayeron las cotizaciones de las frutas por la reducción de los precios del mango Tommy, los limones común y Tahití, el banano criollo, el lulo, la piña gold, la papaya Maradol, la naranja común, la granadilla y la mandarina Arrayana. La reducción de los precios del mango Tommy obedeció al buen momento productivo por el que están pasando los cultivos establecidos en Tolima, Cundinamarca y Valle del Cauca.

Igualmente, se redujeron los precios mayoristas de los tubérculos, debido al comportamiento del plátano hartón verde, la papa capira, la arracacha amarilla, el ñame espino y el ulluco. En el caso del plátano hartón verde se destacó el incremento de la oferta desde Antioquia, Caldas, Meta y Córdoba.

INFORME DE CONTEXTO

Bebidas fermentadas compañeras ancestrales de la civilización humana

Con el paso del tiempo, la humanidad aprendió a aprovechar los organismos del medio ambiente para preparar alimentos y bebidas que han contribuido a nutrir el cuerpo y a relajar nuestros sentidos para compartir en sociedad y celebrar. Una evidencia de esto es la preparación de bebidas fermentadas como la cerveza, la chicha, el guarapo, la horchata y el masato, que nos han dado energía necesaria para afrontar el esfuerzo de cada día. En este informe hablaremos de la cerveza, el guarapo, la horchata y el masato.

Con el paso del tiempo y la observación del medio ambiente y los organismos microscópicos, el ser humano ha logrado preparar alimentos y bebidas que han contribuido a nutrir el cuerpo y a relajar nuestros sentidos para compartir en sociedad y celebrar. Una evidencia de esto es la preparación de bebidas fermentadas como la cerveza, la chicha, el guarapo, la horchata y el masato, que nos han dado energía necesaria para afrontar el esfuerzo de cada día. En el siguiente informe se desarrolla con algunas de ellas como es el caso de la cerveza, el guarapo, el masato y la horchata.

"Dulce de la malta, mediano amargor, lúpulos herbales y florales, con una nota metálica; la combinación malta lúpulo le da carácter, es de cuerpo medio, agradable, crujiente, mediana carbonatación, limpia suave fácil de beber final corto seco y ligeramente amargo pero muy agradable", son las palabras de un catador de cerveza describiendo una cerveza holandesa en el canal beer

Vlogger de YouTube y la cual se consigue en el mercado colombiano.

Pero para que la cerveza llegara a tales características pasó por un camino alterno al de la evolución de la misma civilización.

La cerveza se produce al conjugar cuatro elementos básicos: el agua, la cebada, el lúpulo y la levadura. En cada cultura o lugar del planeta se usaron otros cereales diferentes a la cebada, como el trigo, el arroz, el maíz y el centeno. Y para variar su sabor se usan lúpulos, frutas, hierbas o chocolate.

Para el proceso de preparación de la cerveza, la cebada se mezcla con agua y se da tiempo para que germine. La preparación de la malta consiste en calentar el grano para detener la germinación. Al tostar la malta se generan los diferentes sabores. "La cerveza que bebemos hoy es el resultado de innumerables pequeñas variaciones de un proceso básico"¹.

Los vestigios más antiguos de la preparación primitiva de la cerveza se encontraron en Egipto y datan de hace 9 mil años. Tiempo que ha transcurrido para lograr el aprendizaje del dominio de la fermentación de los cereales. En la actualidad, en el mercado se ofrecen diferentes tipos de cervezas como la ale y lager, cuya diferencia radica en la forma de fermentar la materia prima.

Las cervezas tipo ale tiene una fermentación alta; lo que quiere decir que se fermentan durante máximo dos o tres semanas a temperaturas entre 13 y 16 grados centígrados. Pueden ser cervezas doradas u oscuras.

En cambio, las tipo lager son cervezas que se fermentan a una temperatura baja durante casi 6 meses dependiendo del tipo de sabor o estilo que se quiera producir.

El desarrollo de la industrialización de la cerveza tuvo fases importantes en Europa, en países como Alemania, Inglaterra e Irlanda.

¹. <https://www.youtube.com/watch?v=Y0J7FjoivN0>

Para Colombia, en el año 1887 la llegada de la producción de cerveza marcó el momento en que se inicia el desarrollo industrial. En Floridablanca, municipio de Santander, el inmigrante danés Christian Peter Clausen fundó la Cervecería Esperanza, nombre que fue cambiado posteriormente como Cervecería Clausen. Tiempo después, la empresa que se consolidó a nivel nacional fue Bavaria fundada por el ciudadano alemán Leo Koop, la cual a lo largo de los años se fortaleció en el mercado colombiano integrando marcas como Águila, Pilsener, Clausen y Costeña como resultado de la crisis económica de 1929².

El guarapo es otra bebida fermentada muy conocida en los países donde se cultiva la caña como Cuba, México, Panamá, República Dominicana, Venezuela, Perú, Colombia y el archipiélago de Canarias en España.

Es el resultado de extraer el jugo de la caña de azúcar. Y se consume como bebida refrescante en las épocas de sol. En Colombia, en cada finca donde se cultiva caña se suelen tener recipientes de guarapo para los trabajadores.

En el país, el guarapo es el resultado de la fermentación y para impulsar la fermentación de una nueva preparación se tiene la costumbre de curar las tinajas. Esto se hace "preparando un guarapo más fuerte y dejándolo más tiempo para que haga buen cuncho o supia"³.

También se puede preparar guarapo con piña u otras frutas, papa o plátano maduro. En la Costa Atlántica se prepara el guandolo, que es un guarapo a base de kefir, levadura de cerveza o levadura de pan.

En Colombia se celebra el Festival del mate, el guarapo y la música autóctona. Esta celebración fue declarada patrimonio cultural del municipio de Tuluá (Valle del Cauca) el 1° de marzo de 1991 reconociendo este evento como una manera de fomentar las tradiciones y valores de la cultura regional.

La horchata también hace parte de las bebidas fermentadas y su preparación tiene varias versiones según el país y la cultura. En España la primera versión se preparaba con chufas, un tubérculo que se siembra desde el siglo VIII en Valencia, España. En la actualidad cuenta con la etiqueta de denominación de origen y se siembra en 16 poblaciones. En el país Ibérico se le denomina horchata valenciana; se sirve como bebida refrescante y vigorizante por su alto contenido de azúcar.

En México también se prepara una bebida con el mismo nombre; sin embargo, su preparación es a base de arroz, coco y almendras, aderezada con canela.

El masato es una bebida fermentada que puede prepararse a base de yuca, maíz, arroz o piña. En Colombia se sirve en muchas ocasiones, una de ellas es la llegada del nuevo año o en los encuentros decembrinos como las novenas o reuniones familiares. Al servir se acompaña con buñuelos, mantecada o pan de yucas. Es muy común encontrar esta bebida en Santander, Cundinamarca, Tolima, Norte de Santander y Boyacá.

En otros países de Latinoamérica, como Perú, el masato se prepara a base de yuca sancochada. En la selva amazónica preparan una masa de yuca con agua y azúcar en un recipiente de madera llamado batán. Cuando ya está lista la masa se hace un proceso antiquísimo que consiste en masticarla. Previamente, se realiza para que con las encimas amilosas de la saliva se logre adelantar la fermentación.

De esta manera, el ser humano ha encontrado en las bebidas fermentadas una forma de liberar las tensiones de la vida cotidiana y han acompañado al ser humano en varias etapas de su desarrollo. Es por esto que es algo inimaginable vivir sin ellas, de ahí que salgan frases como que la cerveza es la "leche materna de la humanidad"⁴.

INDICADOR DE ABASTECIMIENTO DE ALIMENTOS

Mayor oferta de alimentos

El abastecimiento en los mercados mayoristas donde el SIPSMA tomó información para las semanas del 3 al 9 y del 10 al 16 de diciembre aumentó 5,84%.

Así, la categoría otros grupos en la que se encuentran las carnes, los procesados, los granos, los cereales, los lácteos, los huevos y los pescados aumentó su abastecimiento en 15,17%, los tubérculos, raíces y plátanos en 7,34%, las frutas frescas incrementaron su oferta en 3,19% y las verduras y hortalizas en 0,87%.

Entre los mercados mayoristas que registraron un alza en la oferta de alimentos se encuentran los de Barranquilla, donde se incrementó el abastecimiento en 32,39% por la categoría de otros grupos, que mejoró sus inventarios en 71,53% debido al mayor ingreso de sal yodada, bocachico, panela, carnes frías y embutidos, arroz, carne de res, lenteja, harina y azúcar. En el Centro de Acopio de Ipiales, el abastecimiento creció 19,09% por los tubérculos, raíces y plátanos que registraron un mayor suministro del orden del 28,69%, ante un aumento en el abastecimiento de las papas Morasurco, suprema, criolla, superior, Betina y capira.

En Pereira, en Mercasa, la oferta de alimentos se incrementó en 16,11%, a causa de las verduras y hortalizas que tuvieron una variación positiva del 37,16% influenciado por el frijol verde, el ajo, la cebolla junca, la zanahoria y el tomate chonto. En el Complejo de Servicios del Sur de la ciudad de Tunja, el abastecimiento subió 13,82%, debido a los tubérculos, raíces y plátanos que presentaron un mayor acopio del

Fuente: DANE

31,43%, por productos como el plátano hartón verde y las papas superior, criolla y rubí.

En cuanto a la Central Mayorista de Antioquia y la Plaza Minorista "José María Villa", en Medellín, los inventarios de alimentos se incrementaron en 12,62% por las verduras y hortalizas que presentaron un mayor ingreso del 15,95%, ante los mayores volúmenes de tomate chonto, pepino cohombro, arveja verde en vaina, frijol verde, habichuela, chócolo mazorca, lechuga Batavia, repollo y tomate chonto. En Santa Marta aumentó el acopio en 11,20% por las frutas que reportaron un incremento del 20,78%, por el mayor ingreso de patilla, piña perolera, limón y naranja común, melón, tomate de árbol y banano criollo.

Respecto a Cavasa y Santa Helena en Cali, el abastecimiento de alimentos ascendió en 6,22% por las verduras y hortalizas que registraron un aumento del 12,54%, como consecuencia de la mayor entrada de remolacha, tomates larga vida y chonto, cilantro, cebolla cabezona, lechuga Batavia, repollo y chócolo mazorca. Finalmente, en Manizales mejoró la oferta en 5,74% por la categoría de otros grupos que registró un incremento del 47,89%, como resultado del mayor ingreso de arroz, sal yodada, maíz blanco, panela, queso, cuajada y carne de res.

Así, la participación para la semana comprendida del 10 al 16 de diciembre fue la siguiente: los tubérculos, raíces y plátanos participaron con el 30,11%, las verduras y hortalizas concentraron el 26,82%, las frutas frescas representaron el 24,22% y los otros grupos el 18,85%.

VERDURAS Y HORTALIZAS

Bajó la cotización del tomate chonto

A lo largo de la presente semana cayó el precio del tomate chonto, en veintiún de los treinta mercados donde se vendió. Los comerciantes afirmaron que esta situación ocurrió ante el aumento en la oferta desde los cultivos de Algeciras, Rivera (Huila), Santa Bárbara, Abejorral, Peñol, Santuario (Antioquia), Montenegro, Quimbaya (Quindío), Alcalá, Caicedonia, Florida (Valle del Cauca), Ábrego, Pamplonita (Norte de Santander), Fómeque, Guayabetal, Quetame, Cáqueza, Fúquene (Cundinamarca), Sáchica, Villa de Leyva, Santa Sofía, Covarachía (Boyacá), Neira y Chinchiná (Caldas). En Villavicencio y Manizales, por ejemplo, el kilo se comercializó a \$1.817 y a \$1.705, respectivamente, 8,01% en promedio menos.

De la misma forma, se redujeron las cotizaciones mayoristas de la habichuela, el pimentón, el fríjol verde cargamanto, la remolacha, la zanahoria, la cebolla cabezona blanca, el repollo blanco y la arveja verde en vaina. En el caso de la habichuela, el precio se redujo en treinta y siete de los cuarenta y un mercados donde se vendió, ya que ingresó mayor volumen de carga desde Santander, Cundinamarca, Huila, Norte de Santander, Valle del Cauca, Antioquia, Córdoba, Boyacá, Caldas y Nariño.

Del mismo modo, los precios del pimentón cayeron en treinta y dos de los cuarenta y cuatro mercados donde se vendió. La anterior situación se debió al aumento en la oferta que ingresó de Ábrego, Ocaña, Bochalema (Norte de Santander), Peñol, El Santuario, Marinilla (Antioquia), Pereira (Risaralda),

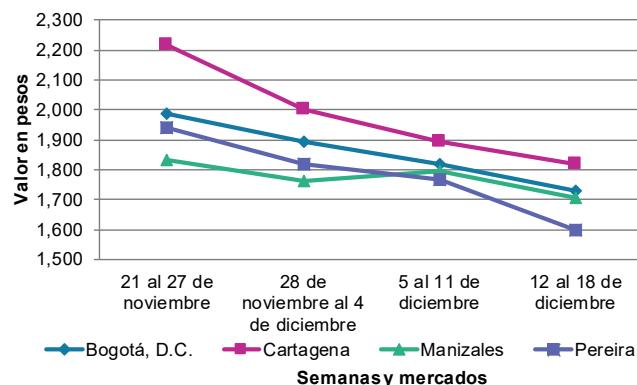

Alcalá, Florida, El Dovio (Valle del Cauca), Fómeque, Cáqueza, Ubaque (Cundinamarca), Piedecuesta, Girón, Los Santos (Santander), Chinchiná, Neira (Caldas) y Pitalito (Huila).

También descendió el precio del fríjol verde cargamanto, según las fuentes, por el mayor abastecimiento de producto de primera calidad proveniente de Antioquia, Boyacá, Nariño, Tolima, Santander, Norte de Santander, Cundinamarca y Caldas. La reducción se presentó en veinte de los veintitrés mercados donde se negoció esta semana.

En contraste, subieron las cotizaciones mayoristas de la lechuga Batavia, el ajo importado, el apio, la espinaca y el pepino de llenar. En el caso de la lechuga Batavia, el aumento en el precio se presentó en veintiún de los treinta y nueve mercados donde se vendió este producto, como consecuencia de la disminución en las cosechas de este alimento originario de Nariño, Cundinamarca, Antioquia, Boyacá, Nariño y la Sabana de Bogotá.

Así mismo, aumentó el precio del apio en diecinueve de los treinta y tres mercados donde se comercializó, ya que se redujo la oferta oriunda de Marinilla, El Carmen de Viboral, Sonsón, El Santuario (Antioquia), Ipiales (Nariño), Madrid, Cota, Anolaima, Zipacón, Une, Funza (Cundinamarca) y Mutiscua (Norte de Santander).

FRUTAS FRESCAS

Buena producción de mora de Castilla

A lo largo de la presente semana se redujeron los precios de la mora de Castilla en veintisiete de los treinta y siete mercados en los que se vendió. Este comportamiento obedeció a la buena producción de la fruta en San Bernardo (Fusagasugá), Pasca (Cundinamarca), Piedecuesta, Santa Bárbara (Santander), Ipiales (Nariño), La Ceja (Antioquia) y Sibundoy (Putumayo). En Bogotá y Santa Helena en Cali, por ejemplo, el kilo se vendió a \$1.824 y a \$2.027, respectivamente, 13,00% menos.

También bajaron los precios del mango Tommy, la uva Isabela, los limones común y Tahití, el banano criollo, el kiwi, el lulo y la piña gold. En el caso del mango Tommy, el descenso estuvo motivado por la salida de las cosechas en San Roque (Antioquia), La Mesa (Cundinamarca), Girón, Lebrija (Santander) y Espinal (Tolima). La reducción se registró en veintinueve de los treintaiún mercados en los que se ofreció a lo largo de la semana.

De la misma forma, cayeron las cotizaciones mayoristas de la uva Isabela en dieciocho de los veintisiete mercados donde se comercializó. Según los comerciantes este comportamiento obedeció al inicio a nuevos ciclos de cosecha en La Unión, Ginebra (Valle del Cauca) y Tarqui (Huila).

Así mismo, descendió el precio del limón común debido a la mayor presencia en los mercados del producto

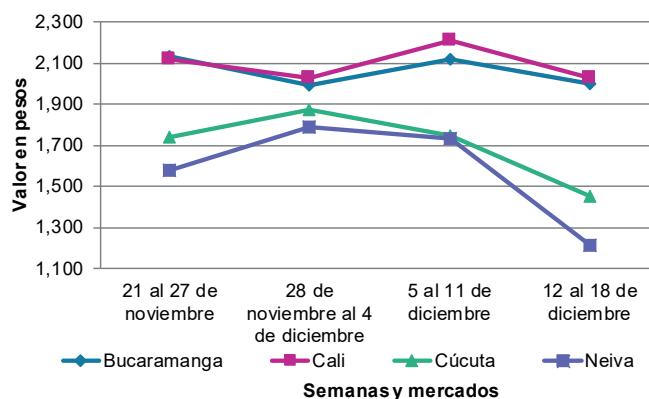

oriundo de Guamo, Purificación, Espinal (Tolima), La Unión, Andalucía (Valle del Cauca), Girón, Rionegro y Cepitá (Santander). El anterior comportamiento se registró en diecisiete de los veintiocho mercados en los que se vendió.

Igualmente, bajó la cotización de la piña gold, esta vez en diecisiete de los veinticuatro mercados donde se ofreció. La caída estuvo asociada a la buena oferta procedente desde las zonas de producción de Armenia (Quindío), Restrepo, Dagua, Alcalá, Caicedonia (Valle del Cauca), Santander de Quilichao (Cauca), Chigorodó (Antioquia) y Lebrija (Santander).

En cambio, subieron los precios del banano Urabá y la patilla. En el caso del banano Urabá, el alza obedeció a la reducción en la oferta de producto oriundo de Apartadó, Carepa y Turbo (Antioquia), donde hay menor producción. Este comportamiento se presentó en once de los trece mercados en los que se vendió.

Por último, se incrementaron las cotizaciones de la patilla debido al menor abastecimiento desde San Martín (Meta), donde está finalizando la época de cosecha. El alza se registró en doce de los veinticinco mercados donde se comercializó esta semana.

TUBÉRCULOS, RAÍCES Y PLÁTANOS

Disminuyeron los precios del ñame espino

En el transcurso de la presente semana se registró una reducción en las cotizaciones de ñame espino en los seis mercados donde se ofreció. Esta situación se debió a una mayor oferta del producto proveniente de Los Córdobas y Moñitos (Córdoba), así como por el inicio de nuevos ciclos de cosechas en San Juan de Urabá (Antioquia). En Barranquillita, en Barranquilla, y Montería, por ejemplo, el kilo se comercializó a \$1.456 y a \$890, respectivamente, lo que indicó una caída superior al 5,00%.

Del mismo modo, descendieron los precios de los plátanos hartón verde y maduro, la papa capira, la arracacha amarilla y el ulluco. Las cotizaciones del plátano hartón verde bajaron por el mayor volumen de carga que ingresó de Lejanías, San Martín, Granada (Meta), Sonsón, Andes, Santa Bárbara, Jardín, Betania (Antioquia), Anserma, Chinchiná (Caldas), Los Córdobas, Lorica, Moñitos y Tierralta (Córdoba). Este comportamiento se registró en veintiséis de los treinta y ocho mercados donde se negoció a lo largo de la semana.

La disminución en la cotización de la papa capira se debió al incremento de la recolección en Iles, Pupiales, Pasto (Nariño), El Santuario, El Carmen de Viboral y San Vicente (Antioquia), donde es alta la producción. La

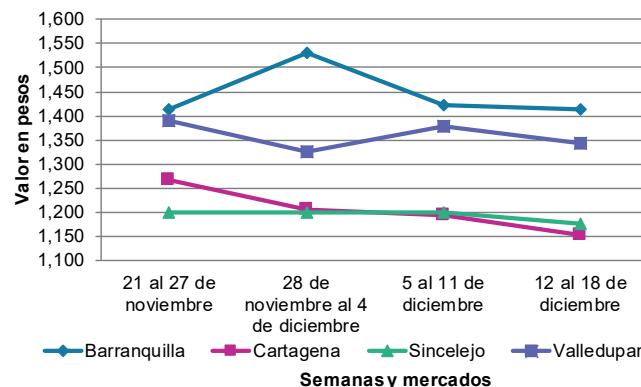

reducción del precio mayorista se presentó en dieciocho de los veintisiete mercados en los que se vendió.

A su vez, los precios de la arracacha amarilla cayeron ante los mayores rendimientos productivos en los cultivos establecidos en los municipios de San Vicente Ferrer, (Antioquia), El Dovio (Valle del Cauca), Cajamarca (Tolima), Nuevo Colón, Tibaná (Boyacá), Une, Chipaque, Quetame, Fosca (Cundinamarca), Mutiscua, Pamplona, Cágota y Chitagá (Norte de Santander). El descenso de la cotización se presentó en dieciocho de los veintiún mercados en los que se comercializó esta semana.

De la misma forma, se redujeron los precios del plátano hartón maduro en nueve de los diez mercados donde se negoció, ya que aumentó la producción desde Lejanías, San Martín, Granada (Meta), Quinchía, Belén de Umbría (Risaralda), Aguadas, Pácora, Anserma, La Merced (Caldas), Pueblorrico, Andes y Jardín (Antioquia).

Por último, se registró una reducción en los precios del ulluco, ya que se incrementó la oferta oriunda de Totoró y Puracé (Cauca), donde se incrementó la producción. El anterior comportamiento se presentó en los seis mercados donde se vendió.

Mayor demanda de queso costeño

Durante esta semana se incrementaron los precios del queso costeño como consecuencia de una mayor demanda para la preparación de platos tradicionales de esta época, como los buñuelos. Este comportamiento se registró en dieciséis de los veinticinco mercados donde se negoció. En los mercados de Corabastos, en Bogotá, y Santa Helena, en Cali, por ejemplo, el alza superó el 6,00% y el kilo se vendió a \$13.850 y a \$12.250, respectivamente.

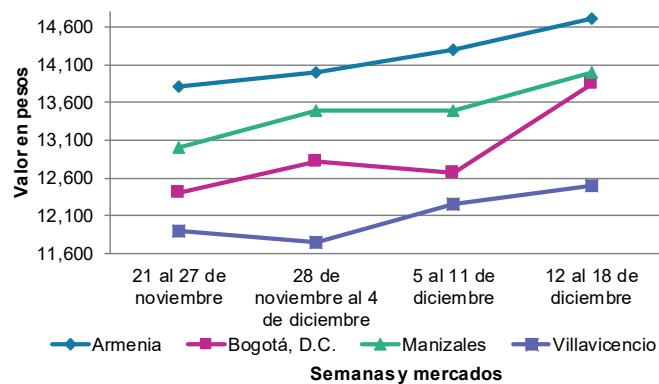

De la misma forma, subieron las cotizaciones del lomo de cerdo sin hueso, como consecuencia de la mayor demanda de este tipo de corte asociada a la época de fin de año; ingresó desde Antioquia, Risaralda, Caldas y Valle del Cauca. El anterior comportamiento se registró en quince de los veintiséis mercados en los que se vendió esta semana.

También aumentó el precio mayorista del aceite vegetal mezcla, esta vez en once de los veintiocho mercados donde se negoció a lo largo de la presente semana. Según los comentarios, este comportamiento estuvo asociado al ingreso de nuevos inventarios a

mayores precios. En Cúcuta, por ejemplo, el litro se vendió a \$4.907.

Finalmente, y en contraste, bajaron las cotizaciones de la arveja verde seca importada por el incremento en la oferta de producto canadiense, lo que ocasionó una mayor disponibilidad en los mercados. Este descenso se registró en diez de los veintisiete mercados donde se negoció a lo largo de la presente semana.
